DIESEL TREATMENT

Features
UTB Diesel Treatment cleans and optimises your diesel fuel system. It is an advanced fuel additive that removes stubborn deposits from injectors and restores the original spray pattern. Suitable for all diesel engines, including common rail and turbocharged engines, and fully safe for diesel particulate filters (DPF). For improving combustion, reducing smoke formation and protecting the entire fuel system against corrosion:

- Restores injector spray pattern
- Improves combustion and reduces smoke formation
- Safe for all modern diesel engines with a diesel particulate filter (DPF)

Applications
Add one bottle of UTB Diesel Treatment to the fuel tank before refuelling (suitable for up to 60 liters of diesel). For optimal performance, it is recommended to use this product at least once a year or at each service interval.
