# RADIATOR LEAK STOP

**Features**
UTB Radiator Leak Stop seals and protects your cooling system. It is a fast acting additive that instantly stops and prevents small leaks in the radiator and cooling system. Suitable for all types of radiators, including aluminium and plastic designs, and fully compatible with all common coolants. For fixing acute leaks and for preventive protection against rust and corrosion, supporting the service life of the cooling system:

- Stops and prevents radiator leaks
- Protects against rust and corrosion
- Suitable for all types of radiators and coolants

**Applications**
Shake the bottle of UTB Radiator Leak Stop well before use and add it to a cold cooling system. Run the engine with the heater set to the highest setting until the product has fully circulated (approximately 10 to 15 minutes). Never open the radiator cap when the engine is hot.
